ABOUT

Motivated and adaptable Full-Stack Developer with experience in building web applications, desktop systems, Discord bots, and collaborative development tools. Skilled in React.js, TypeScript, APIs, Supabase, Flutter, and modern software development workflows. Passionate about creating innovative systems that improve user experience and productivity.

SKILLS

- React.js & TypeScript
- Web Development
- API Integration
- MongoDB & Supabase
- Flutter Development
- Desktop & Mobile Applications
- Git & GitHub Collaboration
- Problem Solving & Teamwork

EXPERIENCE

FULL-STACK DEVELOPER

2025 - Present

Developed custom applications including collaborative IDE systems, freelancer marketplaces, Discord bots, and productivity tools. Worked with React.js, APIs, Supabase, and cloud deployment platforms such as Railway and Render.

INDEPENDENT DEVELOPER / FREELANCER

2024 - 2025

Collaborated with clients to understand requirements and deliver tailored software solutions.

DISCORD BOT DEVELOPER - FREELANCE

2024

Created and maintained Discord bots focused on community engagement, automation, interactive commands, and server management.

PROJECTS

- Jirai IDE - Custom collaborative IDE workspace with project management, shared workspaces, code review, messaging, extensions, portfolio pages, and developer tools.
- Freelancer Marketplace (trabaho) - Platform connecting freelancers and clients with authentication, dashboards, marketplace browsing, workspaces, invoices, payments, reviews, subscriptions, and portfolio settings.
- Interactive Discord Bot (Larpy) - Automation and engagement bot with interactive commands, activities, moderation features, and server management tools.
- META SHARK Admin Dashboard - E-commerce administration dashboard for revenue, inventory, users, orders, seller shops, appeals, category analytics, and geographic reports.
- META SHARK E-Commerce - Multi-role marketplace ecosystem with buyer, seller, and administrator interfaces, checkout flow, notifications, inventory tracking, and order management.
- CSD Learning Management System - Secure learning platform for course content, user management, role-based access, and progress tracking.

- Student Management System - Academic planning and student administration platform with scheduling, grade monitoring, prerequisite checks, and roadmap planning.
- Course Activity Management System - Academic activity tracking tool with dynamic calendar views, automated reminders, schedule management, and analytics.
